In the event replacement is necessary, the new material should match the material being replaced in composition, design, color, texture and other visual qualities. Repair or replacement of missing architectural features should be based on accurate duplications of features, substantiated by historic, physical or pictorial evidence rather than on conjectural designs or the availability of different architectural elements from other resources.*** This element does not apply to this project.
- (g) ***The surface cleaning of resources shall be undertaken with the gentlest means possible. Sandblasting and other cleaning methods that will damage the historic materials shall not be undertaken.*** This element does not apply to this project.
- (h) ***Every reasonable effort shall be made to protect and preserve archaeological resources affected by or adjacent to any project.*** Staff does not think this applies to this project.
- (i) ***Contemporary design for alterations and additions to existing resources shall not be discouraged when such alterations and additions do not destroy significant historic, architectural or cultural material and when such design is compatible with the size, scale, color, material and character of the property, neighborhood or environment.*** Staff believes that the proposed work will meet this requirement for the project.

(j) Whenever possible, new additions or alterations to resources shall be done in such a manner that if such additions or alterations were to be removed in the future, the essential form and integrity of the resource would not be unimpaired. This requirement does not apply to this project.
